Caritas Christi Health Care Signs Agreement to Integrate AM Technologies' Speech Recognition System as Key Component of Its "Office of the Future"

WHYTYPE® Medical System Increases Productivity of Medical Professionals While Reducing Hospitals' Costs

NEWTON, Mass., and BOSTON – June 1, 2004 – AM Technologies, Inc., a leading provider of speech recognition systems, announced today that Caritas Christi Health Care has selected its WHY TYPE® Medical System as the preferred speech recognition system for medical providers in physician's offices. As part of the signed agreement, AM Technologies will integrate its WHY TYPE® Medical System into Caritas Christi's "office of the future," enabling medical professionals to voice-activate their wireless tablet computers throughout their facility.

"Accuracy of clinical information and immediate availability are important results of this system, however, we cannot overlook the cost savings. I believe that the implementation of the WHY TYPE® Medical System by our providers will pay for itself in only a few months by avoiding costly transcription," states John P. Burke, senior vice president and chief information officer at Caritas Christi Health Care in Boston.

Burke continues, " With the WHY TYPE® Medical System, physician assistants carrying laptops during rounds will immediately document their medical notes at the point of patient care. The laptops are connected to the hospital's information system, so when the dictation is complete the patient encounter is available to other providers throughout the existing network."

With this agreement, AM Technologies, Inc. becomes Caritas Christi Health Care's leading provider of computer-based speech recognition technology to physicians and medical personnel affiliated with the six acute care hospitals of Caritas Christi: Caritas St. Elizabeth's Medical Center, Caritas Good Samaritan Medical Center, Saint Anne's Hospital, Caritas Holy Family Hospital, Caritas Norwood Hospital and Caritas Carney Hospital.

"Caritas Christi selected the WHY TYPE® Medical System because of its ability to increase the productivity of medical personnel while reducing transcription costs. The system provides superior accuracy and usability, and is complemented by training and support provided by AM Technologies," said Francis X. Campion, MD, vice president for clinical integration at Caritas Christi Health Care.

“We are honored Caritas Christi selected our company as the preferred vendor for computer-based speech recognition systems, and are committed to continued outstanding service,” said Andrew J. Meshulam, president, AM Technologies, Inc. “A number of specialists at Caritas Christi already reap the benefits of WHY TYPE’s reliability and accuracy – they are spending more time with their patients instead of laboriously handwriting or typing medical notes, while contributing to their hospitals’ medical recording cost reduction. We look forward to partnering with Caritas Christi as it rolls out speech recognition technology as an enabler of better patient care throughout its hospital network.”

About WHYTYPE

AM Technologies' WHY TYPE® Medical System is specifically designed for medical professionals to create patient records, medical reports, notes, correspondence, and other documents by using voice. The WHY TYPE® Medical System includes a proprietary and customized training program. The system features a comprehensive medical vocabulary, and optimization of medical terms can be provided for each medical specialty to increase speed, accuracy and performance. The WHY TYPE® Medical System is currently used by a number of professionals in specialized medical and healthcare information management markets (see website www.whytype.com). Simply by speaking, users create text, issue commands, and enter and access data, which enables convenient, immediate and legible means for medical records documentation, while providing hospitals with savings from transcription costs.

About Caritas Christi Health Care

Caritas Christi Health Care, the second largest health care system in New England, is a comprehensive, integrated Catholic health care delivery network providing community-based medicine and tertiary care in eastern Massachusetts, southern New Hampshire and Rhode Island.

Acute care hospitals in the system include Caritas Carney Hospital, Dorchester; Caritas Good Samaritan Medical Center, Brockton; Caritas Holy Family Hospital and Medical Center, Methuen; Caritas Norwood Hospital; Caritas St. Elizabeth’s Medical Center, Boston; and Saint Anne’s Hospital, Fall River. Non-acute facilities include Caritas Home Care; Caritas Good Samaritan Hospice; Caritas Medical Groups; Laboure College; Por Cristo; St Joseph Nursing Care Center; and Caritas St. Mary’s Women and Children’s Center. Visit www.caritaschristi.org for more information.

About AM Technologies, Inc.

AM Technologies, Inc., is a leading provider of PC-based speech recognition systems. The company develops, markets and supports high-performance, cost-effective speech solutions that empower users with convenient, yet accurate record keeping, while enabling organizations substantial savings over transcription costs. Founded in 1994, AM Technologies is privately held and is located in Newton, Massachusetts. It has also developed products geared toward legal, executive, and disabled users respectively with its WHY TYPE® Legal System, WHY TYPE® Executive System and WHY TYPE® Hands-Free System.
