

“These guys (at AM Technologies) are wonderful.”

Christopher Reeve
Interviewed by Good Housekeeping Magazine

“Within one month I can easily say that I saved over \$600 in typing fees.”

Steven Shama, MD, Dermatologist

AM Technologies, Inc. is a leader in providing speech recognition solutions. The WHY TYPE® Hands-Free Solution (WTHFS) is a customized add-on to speech recognition software, such as Dragon® NaturallySpeaking®, tailored to meet the needs of people diagnosed with RSI, Carpal Tunnel Syndrome, Spinal Cord Injuries, Arthritis, Dyslexia, ALS, MS, etc. With the WTHFS, users can talk into their favorite word processor, spreadsheet, e-mail, etc, entirely by voice. Documents can be produced immediately. There is no drawn-out transcribing, typing, revision and editing process. Simply speak into the microphone and your words appear on your computer screen.

AM Technologies offers on-site computer training as well as consultation!

AM Technologies' WHY TYPE® Hands-Free Solution:

- * **Allows** immediate document creation.
- * **Increases** productivity and legibility.
- * **Enables** significant cost savings.
- * **Integrates** with Windows based software.
- * **Incorporates** Dragon® NaturallySpeaking® Software.
- * **Offers** availability 24 hours a day, 7 days a week.

AM Technologies is the preferred speech recognition vendor and/or partnership status with CareGroup Healthcare, Caritas Christi Health Care and Partners HealthCare. For a more comprehensive look at speech recognition solutions or to increase your understanding and use of the latest computer technology, call AM Technologies, Inc. at **1-800-WHY-TYPE®** or visit www.WHYTYPE.com.
